

Knowledge Leadership Group Report

Submitted by Thomas Smith, Chair, Chapter Knowledge Liaison Coordinator

As part of its organizational strategy, the IAM has developed a Knowledge Leadership Group, whose charter is to support both the individual journey and the corporate journey in asset management.

The figure below provides a nice summary and handy reference to the key IAM publications and programs aligned to each of these journeys. These programs and publications are available to members on the IAM website, and it would be useful for members to become familiar with each of them, as a way of understanding what the IAM has to offer.

Future USA Chapter newsletter articles and webinars will focus on individual programs and publications and provide examples of how they are being used.
